Product information AB316

A-solar Aurora Camera Bag

A-solar presents the world's first camera bag with a solar panel! This professional bag is ideal for safely storing your camera and charging your camera (and phone!) battery using solar and / or USB.

The top of the Camera Bag is equipped with a powerful 2.7Watt solar panel, which can charge the included Quartz Camera Charger. To protect your precious items from the elements, the zippers are waterproof and the bag is made from splash proof, recycled PET-Bottles. To keep things practical, we have added two additional pockets for your cables or other accessories on the outside. Furthermore, the Camera Bag has a detachable shoulder strap, so you can carry it without it.

The inside of the bag has a large main compartment which can be divided into smaller compartments with velcro room dividers. At the side, there is a special compartment for storing the included A-solar Quartz Camera Battery Charger.

The included Quartz Camera Charger (AM111), is able to charge your camera battery pack (3.7V - 7.4V), AA or AAA batteries can can even recharge your mobile devices such as a phone or tablet without any hassle.

The Quartz charger itself can be either recharged via its own integrated solar panel, but for extra fast charging we recommend to plug it directly into the bag's 2.7 Watt panel. You can also charge the Quartz by USB or Mains and use it as an extra power supply while on the go.

Specifications

Article number	**AB316**
Dimensions product	20x29x17cm
Color	Black
Weight	700 grams
Solar panel	2.7Watt
Battery	1800mAh li-ion
Input	5V/500mA
Output	5V/1A
Packaging	Retail sleeve
EAN code	8718182270990
Output	Female USB
